

1st International Conference on Renewable Energy: Fossil Energy Resources Contribute to Environmental Degradation ...Says Experts

By Lamara Garba

VC, Prof. Sagir Adamu Abbas, former ES, NUC Prof. Abubakar A Rasheed, Prof. Emeritus A.S Sambo and Director CREST, Prof. Nasir Isa Fagge at the opening ceremony of the 1st International Conference on Renewable Energy

The constant use of fossil energy resources which emit significant quantities of carbon dioxide has been raising global temperature thereby adversely affecting the environment, a renowned expert in renewable energy, emeritus Professor Abubakar Sani Sambo, has said.

Presenting a keynote paper at the 1st International Conference hosted by the Bayero University, Kano's Centre for Renewable Energy and Sustainable Transition on Wednesday, 16th October, 2024, he noted that "The rise in temperature leads to climate change which will disrupt the agricultural situation. Rainfall will not come as we know it and therefore affects food production."

Professor Sambo, who is the President -elect of Nigerian Academy of Science (NAS) advocated for use of electric vehicles and other components of renewable and alternative energy to achieve even development in the country.

The paper titled "Alternative Energy Sources of Sustainable Development in Nigeria" explained the urgent

need for political will and determination to take action on utilizing the renewable energies the country is abundantly blessed with.

"Countries set clear goals for megawatt production, identified sources to supply the megawatts, and provided the conducive environment for investors to move in the desired direction, guiding them to achieve the desired outcomes.

According to him even smaller countries like Ghana, Cape Verde, Kenya, Rwanda, Cote d'Ivoire and Senegal whose government have enhanced political will in electricity sector have expanded to greater electricity access.

The Professor of Nuclear Science, who teaches at the Faculty of Engineering and Environmental Design at Usmanu Danfodiyo University, Sokoto, further explained that fossil energy resources such as coal, oil and natural gas which have been the dominant sources of energy for electrification, transportation and industrial production in the country are highly polluting and exhaustible with CO2

emission, complicating global warming and climate change which affects agriculture and food security.

The former Vice Chancellor of Abubakar Tafawa Balewa University (ATBU), Bauchi, added that there is need for investing and harnessing renewable energy sources like solar, wind, hydro, geothermal, biomass among others with a negligible greenhouse gases, noting that, it can boost energy supply, provide job opportunities and also create a sustainable environment.

Professor Sani Sambo, a onetime Director General of the Nigerian Energy Commission, however tasked the federal government and other stakeholders on making realistic targets and providing the enabling environment for renewable energy to thrive.

In his virtual presentation, Prof. Kevin Nwaigwe, of Clean Energy Research Center, (CERC), University of Botswana stated that the goal of energy access is to provide environmentally sustainable, safe, reliable, and affordable energy for all. "Universal energy access and the elimination of energy poverty are urgently needed for the growing world population," he said

He explained that about 13% of the world's population (approximately 940 million people) does not have access to electricity, adding that about 40% of the world (approximately 3 billion people) does not have access to environmentally sustainable fuel for cooking.

"In sub-Saharan Africa, only 82 per cent of people have access to any form of electricity leaving about 18 per cent of the population without access to electricity (UN, 2021). According to him, about 85 per cent of those lacking access to electricity globally reside in rural areas with sub-Saharan Africa accounting for 75 per cent of this population.

Earlier in his remark, the Vice Chancellor Prof. Sagir Adamu-Abbas, commended the Centre for organizing the

conference which according to him, would go a long way in enlightening the people and those on power about the significance of renewable energy.

He urged the participants, which include students to use the knowledge they acquired at the conference and put it in practice. He said the Management will do everything possible to improve the environment conducive for research and learning.

In his opening remarks, the Chairman of the occasion and immediate past Executive Secretary of the National Universities Commission (NUC), Professor Abubakar Adamu Rasheed, described the hosting of the conference as timely.

He said for Nigeria and other developing nations to grow and prosper, they must find an alternative energy, particularly taking into consideration the global warming and desertification.

Professor Rasheed, also a onetime Vice Chancellor of Bayero University, commended the Centre for Renewable Energy and Sustainable Transition for the conference, advising participants to come up with a strong policy suggestion which will bail Nigeria out of the logjam.

Earlier, the Director, Center for Renewable Energy and Sustainable Transition (CREST), Prof. Nasir Isa Fagge, said experts from across the world converged to brainstorm on alternative and renewable energy requirement, generation and supply.

He said energy crisis in Africa, particularly in Nigeria, is severe as they are struggling to meet with the global requirement for energy per capita.

"We would explore green sources of energy including solar energy, biomass (waste energy), nuclear energy which are all considered a net zero carbon emitter and cleaner alternative to fossil fuels among others," he said

BUK Inducts 39 Doctor of Pharmacy

By Nura Garba

A total of 39 graduates from the Faculty of Pharmaceutical Sciences, were inducted into the Pharmacy Profession.

The ceremony which took place at Mahmoud Tukur Theatre at the Old Campus on Thursday, 24 October, 2024 was the second batch since the commencement of the D. Pharm programme.

The event underscored the graduates' role in advancing healthcare and combating the menace of drug abuse in Kano State and Nigeria at large.

Kano State Governor, Abba Kabir Yusuf, urged the new pharmacists to make good use of their qualifications, particularly in light of the rising drug abuse problem in the state.

The governor, represented by the Commissioner for Health, Dr. Abubakar Labaran urged the inductees to be exemplary ambassadors of Bayero University Kano.

"The certificate you have received can be used either positively or negatively. I urge you to abide by the professional guidelines of your field," the governor cautioned.

Graduands of Pharmacy taking the oath of allegiance

On his part, BUK Vice-Chancellor, Prof. Sagir Adamu Abbas emphasized that learning does not end with graduation.

"You are entering a dynamic field that is constantly evolving. You must continuously adapt, innovate, and contribute to new discoveries," he said.

He further stressed the importance of research, innovation, and technology transfer, noting, "It is in this spirit that I encourage you to focus not just on your careers, but also on shaping the future of healthcare."

Professor Abbas reminded the graduates that in the modern era of personalized medicine, the role of pharmacy has expanded. "Pharmacy is no longer just about dispensing medications, but about creating solutions," he added.

As the inductees took their professional oath, the Registrar of the Pharmacists Council of Nigeria, Pharm. Ibrahim Baba Shehu, represented by Dr. Anthony Idoko, reminded them of their responsibility to uphold the ethics of the profession.

He encouraged them to remain resilient and perform well during their one-year internship, stressing that their profession maintains high standards.

Speaking on behalf of the graduates, Zubair Abdulkadir, the best-graduating student, expressed gratitude to God for allowing them to witness the milestone, stating, "I feel deeply humbled to have reached this stage."

Earlier, the Dean of the Faculty of Pharmaceutical Sciences, BUK, Prof. Ibrahim Adamu Yakasai, said the new Doctors have sacrificed, faced difficulties and navigated rigorous academic programs to earn this esteemed degree. He said that Bayero University is proud of them and they should be good ambassadors of the University by exhibiting the high moral values instilled in them.

Crop Scientists Seek Role for their Members

By Nura Garba

Crop Science Society of Nigeria (CSSN) members have urged government, at the federal, state and local levels, to engage services to their members with a view to overcoming the problem of food insecurity in the country.

A communiqué issued at the end of the 9th National Conference and Annual General Meeting, held at Bayero University, Kano (BUK) with the theme: "Transforming Crop Production in the Face of Insecurity and Economic Crisis: Challenges and Opportunities."

The conference recommended "adoption of advances in biotechnology, effective government policies such as access to credit, agricultural extension services, functional partnerships and social safety nets that provide farmers with resources, education and infrastructure" in tackling the current food security challenge in Nigeria.

In their talks on innovative solutions in crop science, the speakers observed that global food crisis is hitting the country hard and food prices are soaring due to food shortage, because of the nation's reliance on oil driven economy.

"It has become imperative for the three tiers of government to holistically engage crop scientists in the sustainable production of safe and affordable food for improved human health, export market and economic prosperity of Nigeria.

Nigeria's path to progress requires economic diversification, good governance, and tackling security crisis hindering farmer's productivity through the deployment of superior weaponry, dialogue and economic measures," a communiqué at the end of the conference said.

The meeting had in attendance government officials, members of Agriculture and Allied agencies and farmers' associations, representatives of Agro-allied Industries, NGOs, Extension and Advisory Services, many university VCs, deans and students.

There were 130 major participants across Nigeria and other African countries, from 20 institutions across the nation

representing universities, research institutes, polytechnics, Colleges of Agriculture, industries and private and government agencies.

"Agriculture, which employs most Nigerians, remains underdeveloped, with small-scale farmers relying on outdated techniques without high-quality seeds resulting to poor output.

Participants of the 9th CSSN National Conference hosted by the Faculty of Agriculture, BUK

"The country is beset by Boko Haram insurgency in the northeast, armed banditry in the Northwest and North Central regions, and herders-farmers conflicts across the country, thus exacerbating economic challenges, displacing people especially farmers, disrupting agricultural production, and deterring investment," the meeting further observed.

According to the communiqué, climate change is disrupting traditional farming practices, while lack of infrastructure, training, and financial support, coupled with poor adoption of modern agricultural technologies are other challenges.

"A substantial portion of agricultural produce is being lost due to inadequate storage, poor processing facilities, and inefficient transportation systems resulting in a loss of 40

percent of food produced during post-harvest, contributing to food insecurity and reducing farmers' income,” Minister of Agriculture and Food Security, Sen. Abubakar Kyari, represented by Engr Abdullahi Abubakar, said.

The conference recommended: “the development and dissemination of improved seed varieties that promote agricultural diversification.

“Development of specialised training centers in rural areas that focus on modern agricultural practices and post-harvest technologies.

“Targeted strategies, such as empowerment through post-harvest value addition, women, youths and people with special needs to become key players in transforming Nigeria's agricultural landscape.”

BUK Reconstitutes Board of Staff Model Secondary School

By Mustapha Gide

Members of the constituted Board of Staff Model Secondary School in a group photograph, shortly after their inauguration

The Bayero University Staff Model Secondary School was inaugurated on Monday 7th October, 2024 with a mandate to elevate the school's standing to compete with leading secondary schools in Kano metropolis. The Chairman, Professor Ali Idris disclosed his goal during the inauguration.

Professor Idris said part of strategies to uplift the school was the formation of four sub-committees that consist of Technical and Academic Committee, Recruitment and Upgrading Committee, Staff and Students' Disciplinary Committee as well as Finance and General Purpose Committee.

The Chairman said the Vice-Chancellor, Professor Sagir Adamu Abbas had carefully selected members of the School's Board whom he believes can move the school forward. He urged the members to do the needful in order to achieve the desired goal, adding that changes had started manifesting with the effort of the School Management and that of the Board's Chairman, appointed in October 2022.

He listed some achievements recorded in the School to include the purchase of laboratory equipment upgrade of computer laboratory with 6 additional computers, networking and installation of software for analysis of results, fixing of valves in the school's walls to strengthen security, repair of roofing, installation of solar powered system, conversion of the school's hand pump to motorized system, improvement of the school's sickbay with additional bed, purchase of sports facilities and upward adjustment of staff salaries.

The School's Principal, Alhaji Tijjani M. Adamu who traced the history of the School to early 1980's said the present enrolment of students in the school was 706. He commended the efforts of the Board's Chairman for the solarizing 20 classes with light in the school, laboratories, administrative block and surrounding security light.

The Principal said, staff of the school were given 15 percent of their salaries as palliatives during Eid-El-Kabir and Eid-El-Fitr and that the PTA renovated the girls' toilets. He added that in 2023/2024 academic session the school hosted competitions and winning clubs were presented with prizes. In the 2nd term, the school held indoor games while in the 3rd term, students were engaged in debating competition and winners were presented with prizes. The school he added among eleven schools secured 5th position in junior entrepreneurship competition.

He expressed delight that in 2022/2023 academic session the school recorded 92.7 percent success on WASSCE, 99.81 percent on NECO and 86.86 percent on BECE, adding that during 2023/2024 session the school recorded 95 percent success on WAEC and 96 percent on NECO.

The Board has Professor Ali Idris as Chairman and Mustapha Mohammed Gide as Secretary while Professor Abdussamad Umar Jibia (PTA Chairman), Mutawakilu Muhammad, Altine M. Ali, Dr. Zainab Musa Iliasu, Rabi Ibrahim Maitafsir, Professor Hajara Sanda, Aduku James, Alhaji Tijjani M. Adamu (Principal), Dr. Abdullahi Shehu, Kamal Muhammad, Saddiqa Tanimu 'Yar'adua and Isma'ila Tukur Gaya serve as members.

CGS Collaborates With AAPAN to Commemorate World Arthritis Day

By Fausat A. Opayomi

The Center for Gender Studies in collaboration with Arewa Arthritic Patients Association of Nigeria (AAPAN) joined the rest of the world to celebrate World Arthritis Day with a round table discussion titled "Informed Choices, Better Outcomes" on Monday 15th October, 2024 at the CGS Conference Room.

The Director, Center for Gender Studies, Amb. Dr. Safiya Ahmad Nuhu in her opening remarks said the CGS was established in 2015 to carry out research, training and project on issues that cut across gender, she said the center conducts research based initiatives surrounding gender issues and take cognizance of vulnerable people, women, children, persons with disability, internally displaced persons among others.

She said CGS articulated area of interest is inclusive development and was happy to collaborate with Arewa

Participants in a group photograph

Arthritic Patients Association (AAPAN) of Nigeria and also invite key stake holders to commemorate the day.

She said arthritis is a serious ailment and sometime life threatening and not many people know about the ailment due to inadequate support, strategies and advocacy in the care of the ailment.

The Chairman of the discussion, Prof. Doctor, Ibrahim Alhaji Daiyyabu, a renowned Consultant Rheumatologist in Northern Nigeria said as a young Residence Doctor in 2003 mentored by Prof. Musa Borrodo who was his Head of Department then, attended a lecture delivered by the only Rheumatologist in Nigeria at that time in the person of Prof. Olufemi Adelowo, to medical students and residence doctor and in the cause of the lecture he discovered there was lack of manpower to cater for people with arthritis and as result decided to fill the gap by studying a sub specialty which is Rheumatology.

He said today Nigeria has over 40 trained Rheumatologist in the country and that Aminu Kano Teaching Hospital (AKTH) has one of the highest numbers of trained Rheumatologist in the country.

According to Dr. Daiyabu, arthritis is not a disease but a symptom that says one or more joint is swollen, which can be caused by trauma or even microorganism that find its way into the body system. He said there are several cases of arthritis and children are not spared, disclosing that the only Pediatric Rheumatologist in Nigeria is in Lagos State Teaching Hospital and he is looking forward to seeing the gap being filled.

He advised that when joint are swollen and painful the patient should go to the nearest hospital for diagnoses and remedy, and contrary to popular believe, exposure to cold is not the cause of arthritis but only aggravate the symptom said Dr. Daiyabu

He said there is need for advocacy by collaborating with care givers, patient associations group on societal misconception about arthritis

There are paucity of manpower according to Doctor Daiyabu that takes care of people with arthritis because there are other stakeholder apart from rheumatologist such as orthopedic surgeons and Physiotherapists that add values to taking care of patients with arthritis.

According to him, finance in taking care of arthritic patient is enormous because essential drug list does not include the ones for arthritic patients and majority of the drugs are not covered by NHIA causing problem from getting drug out of pocket.

He said health insurance coverage for arthritic patient is abysmal and there is need for strategic planning that can help mitigate problems in arthritic care and that the condition can also impair functions, cause low productivity and absenteeism from work.

Arthritis according to Dr Daiyabu can be prevented through healthy living, exercise, eating of balanced diet, proper use of foot wear among others.

Dr. Yakubu Abubakar, a discussant and a Physiotherapist from Aminu Kano Teaching Hospital (AKTH) said, physiotherapy is an integral part of arthritis care and that the challenge is information concerning arthritis. He said there is need to keep educating patients about the condition and how to manage it, patients according to him should be advised that care of arthritis is multidisciplinary approach and should be refer to other professionals.

He advised arthritic patients on early intervention and care because if detected early it can be cured and those that cannot be cured can be well managed.

Dr. Daiyyabu said living with arthritis is not synonymous to being disabled, but some of those that come late for help end up being deformed.

He said lots of people do not know about the existence of Rheumatologist who are trained to care for patient with arthritis, he therefore advised association like Arewa Arthritic Patient Association of Nigeria to do the advocacy of the presence and existence of Rheumatologists. Prof.

Binta Jubril from Department of Economics expressed her appreciation for the opportunity to attend the event as a stakeholder.

She said she was stunned at the number of gap in the professionals in arthritic care and that the country needs visionary leaders at all level who are concerned about the wellbeing of the people.

She said healthy life style, balanced diet; regular exercise is important so as to prevent arthritis and other related issues. She disclosed that losing weight as one of the ways to

prevent or reduce arthritis is weight loss which is a struggle and patients' needs assistance to achieve it.

She said round the seasons, there are affordable fruits and vegetables that substitute what to eat and patients need to be committed and taught how to do it.

The Deputy Director, CGS, Dr. Mufida Bello said it is a good idea to start the advocacy through media , a walk can also be initiated to create awareness, social media such as face book whatsapp group can also take up the advocacy challenge.

CGS Honours Former Director, Deputy

By Fausat A. Opayomi

The Center for Gender Studies, Bayero University Kano has organized a farewell reception in honor of its former Director, Dr. Suwaiba Sa'id Ahmad and the former Deputy Director, Research, Prof. Aminu Muhammad Dukku on Thursday 10th October, 2024 at the CGS Conference Room.

Speaking at the event, the Director, CGS, Dr. Safiya Nuhu in her remarks said the occasion was meant to celebrate and acknowledge the contributions of the celebrants towards development of the center.

VC, Prof. Sagir Adamu Abbas presenting a gift to former Director CGS, Dr. Suwaiba Said Ahmad

She expressed her gratitude to the Vice Chancellor, Prof. Sagir Adamu Abbas for his unwavering support towards the center, she disclosed that there is significant improvement in the enhancement of the physical facility of the center and the utilization of the ICT and Human Resources for health learning hub at the center.

She said her appointment as the Director was like a home coming, since she also served as the Deputy Director, Training, prior to her appointment as an Ambassador.

According to her, Prof. Aisha Ismail and Prof. Hassana Darma as well as Dr. Suwaiba Sa'id who served as the Director of the center left foundation and structure to work on and that she sincerely valued their contributions towards the uplifting the center.

She also congratulated the former Ag. Registrar, Hajia Amina Umar for a successful tenure and thanked for her support.

Amb. Dr. Safiya said the vision of the center is to foster inclusion and that some significant improvement such as staff capacity building; setting up of task force to improve visibility of the center; revamped social media pages; framework for expanding collaboration; continuation of Education for Sustainable Development (ESD) and mentorship program for young girls in peace building.

The Vice Chancellor, Prof. Sagir Adamu Abass in his remarks congratulated the celebrants and commended them for the giant stride they have achieved during the discharge of their duties as Director and Deputy director respectively, he described Dr. Suwaiba Ahmad Sa'id, as a hardworking person who goes beyond and above to deliver any assignment given to her.

Amb. Prof Ahmad Makarfi in his goodwill message described the past directors of the center as pacesetters going by their track records.

Director, DRIP, Prof. I. A Rufai said the gathering was a testament to the fact that there were giants that had contributed to the circle of success at the center, adding that the center started on a good footing, hence the need to recognized the effort of the past Directors of the center

Prof. Binta Tijjani Jubril , commended Prof. Aisha Ismail for building a solid foundation as the pioneer Director of the center, said the center was lucky to have amazons after amazons as Directors, she congratulated Dr. Suwaiba for her achievement and contribution to the center.

Prof. Talatu Musa Garba, commended Dr. Suwaiba for her diligence and dedication to duty, she urged her to continue her good work, adding that as her mentee she is proud of her achievement.

Prof. Hassana Darma in her goodwill message said she was happy with Dr. Suwaiba's achievement because she has capability for zeal and hard work.

Prof. Aisha Abdul Ismail who was the pioneer Director of the center thanked the Director for putting the event together and that she was not surprised at the achievement of Dr. Suwaiba whom she said had always being a goal getter.

She said it was important to always educate the public that the center for gender studies is not all about women and girls but vulnerable people in the society irrespective of their gender.

Responding, Dr. Suwaiba Sa'id Ahmad in an emotion laden voice said CGS was her second home and a nice place to work, she commended Prof. Dukku for his unflinching support and also the supporting staff for their support and cooperation, which has made her job easier.

She thanked the Vice Chancellor, Prof. Sagir Adamu Abass whom she described as a worthy leader and her mentor for appointing her as a Director of the center.

Dr. Suwaiba said she was happy that Amb. Dr. Safiya, whom she described her zeal and attitude to work as top notch, was appointed as her successor because she believes

her connection and linkages will bring significant development to the center.

She disclosed that her seven months as the Provost of the college came with a lot of challenges but was happy to report that she had achieved so much, among which was full accreditation, for the entire program offered in the college.

She also disclosed that the college, now adhere strictly to college parliament and that all admission is now strictly based on JAMB admission regulations unlike what was obtained in the past. The Deputy Director, Training.

KANO INDIGENOUS LANGUAGES OF AFRICA FILM MARKET & FESTIVAL (KILAF),
POWERED BY MOVING IMAGE LIMITED

in collaboration with

FACULTY OF COMMUNICATION,
BAYERO UNIVERSITY, KANO

P r e s e n t s

KILAF 2024 Conference: Call for Abstract Submission

Main theme:

FORGING CULTURAL HYBRIDITY IN A MULTILINGUAL AFRICA: THE ROLE OF INDIGENOUS LANGUAGE FILMS

Over the years, indigenous films have reflected the lives and cultures of various African ethnic groups. While attesting to the unique expressions and realities of these groups, the film has inadvertently revealed a conglomeration of multilingual identities. The plethora of languages and cultures represented in African indigenous language films evokes a need to examine the unique traits of each ethnic composition and how such could or have forged some form of cultural hybridity in filmic production. This examination has the potential to underscore theoretical as well as practical fields of apprehensions and contestations in the understanding of language, ethnicity, identity, culture and film. It is upon this notion that KILAF 2024 invites well-researched papers, personal/professional testimonies, panels, and film presentations on the theme **FORGING CULTURAL HYBRIDITY IN A MULTILINGUAL AFRICA: THE ROLE OF INDIGENOUS LANGUAGE FILMS**.

SUB- THEMES:

- The Impact of Indigenous Language Films on Linguistic Diversity in Africa
- Representation and Identity: Indigenous Languages in African Cinema
- Language as a Cultural Tool: The Role of Film in Revitalizing Indigenous Languages
- Cinematic Storytelling: Indigenous Narratives in African Film
- Transnational Filmmaking: The Influence of Multilingualism on Film Production in Africa
- Indigenous Language Films and Youth Engagement in Africa
- The Role of Film Festivals in Promoting Indigenous Language Films
- Film as a Medium for Social Change: Addressing Cultural Identity Through Indigenous Languages
- Globalization and Indigenous Languages: Challenges and Opportunities in African Cinema
- Cultural Hybridity: The Intersection of Indigenous and Colonial Languages in African Filmmaking
- Audience Reception of Indigenous Language Films: A Study in Cultural Identity Formation
- Documentary Filmmaking and Indigenous Languages: Preserving Oral Histories in Film
- Language Preservation and promotion of Endangered Language through African Indigenous Language Films
- Film as a tool for Social Exchange in a Multilingual African Society
- Challenges and Opportunities: Obstacles and Advantages of producing and distributing Indigenous Language Films
- African Indigenous Language Films and Diasporic Identities

KILAF'24 Conference is scheduled to take place in Kano, Nigeria on

**Monday 25th & Tuesday 26th
November, 2024.**

You are hereby invited to submit your abstract/intention on or before **20th October 2024** and your full papers (3,500 - 5,000 words) on or before **10th November, 2024.**

Kindly note that the preferred referencing style is APA 7th Edition.

Please forward your abstract to both:
